

RELEASE NOTES

Release Date: 12/09/2022

PC Link Version: 6.23.15

Firmware Version: 6.23.6

New features:

- Added Oil Temperature and Oil Pressure values to R53 Mini CAN stream.
- Added Cam Pulse 1x and Cam Level trigger sync to Rover K Series 1L6 (14,3,13,2) trigger pattern.
- Added new 'Link CAN Gauge Extra' CAN mode for transmitting existing extra values and new values added in Gauge App version 2.1.8.1.
- Added new 'CAN Aerospace' CAN mode for transmitting some runtimes in the Dynon Skyview format.
- Added Link Razor PDM CAN Mode.
- Added another 8 CAN An inputs.
- Added Chev LT5 Trigger Pattern.
- Added option to not Auto Save PCLink Layout on exit.

Changes:

- Improved Limit Statuses.
- Improved Quick Trim (Shortcut M) operation.

Fixes:

- Fixed EVO7-9 Trigger sync.
- Fixed Math Block loop rates, this will affect any equations using average (av), delta (dt), peak (pk) and counter (cnt).
- Fixed incorrect 'ECU is in Boot Mode' warning showing up on auto connect intermittently.
- Fixed Passwords with trailing spaces not working.
- Fixed Settings Menu not updating on basemap lock/unlock.
- Fixed exceptions that occurred when opening a locked map while a locked map is already open.
- Fixed Quick Tune form not working when load is on X axis.
